Dear Dion

Re: WATERPROOFING OF BASEMENT CAR PARK

I am writing to thank you and your team for the work carried out at our property at 333 William Street, Northbridge and after speaking with Nicko today I understand that this work has been completed.

It will be necessary for us to arrange for regular maintenance of the pipes and pump area to remove any blockages and silt so that the system does work effectively in the future and we will certainly arrange for this to happen.

I have received your Invoice SH007 totaling \$70,620.00 including GST and have forwarded this to our Territorial Headquarters for payment to your company.

I would like to thank you and your team once again for the excellent way in which you went about this work. It was a pleasure to have your guys on the property and they certainly treated us with a great deal of respect as they went about their work.

I trust that you will be able to resolve the matter of the sub-station with Western Power and that you will be able to carry out that additional work at their expense. Nicko also suggested that he would want to call back in approximately six months to check on our situation with our waterproofing and I would certainly appreciate this happening.

Yours sincerely

Gary Hart (Major)
